March 29, 2008 - Canna Software has released under the GPL license a graphical user interface for the Linux program pk2cmd, a software program that allows the user to use Microchip's PICkit 2 programmer to program the Microchip series of microprocessors.

Version 1.0.1 of the Kpk2cmd was designed to build upon the functionality of the pk2cmd program, but adding in ease of use.

Both pk2cmd and kpk2cmd can be downloaded from [here](#).

Kpk2cmd has been released under the GPL and is copyright Canna Software 2008.
